

Subscription Aware

The *Subscription Aware* feature in many of the 2006 family of Autodesk products makes it easy to access subscription services.

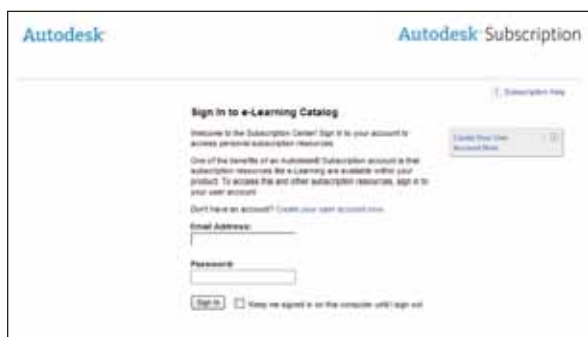

Autodesk Subscription provides the latest releases of Autodesk® software, incremental product enhancements, personalized web support direct from Autodesk technical experts, and self-paced training. Autodesk Subscription customers can now easily access e-Learning and web support and edit their Subscription Center profiles directly from the Help menu in the following products:

- AutoCAD® 2006
- AutoCAD® Electrical 2006
- AutoCAD LT® 2006
- AutoCAD® Mechanical 2006
- Autodesk® Architectural Desktop 2006
- Autodesk® AutoCAD® Revit® Series 8
- Autodesk® Building Systems 2006
- Autodesk® Civil 3D® 2006
- Autodesk® Civil Design
- Autodesk Inventor® Professional 10
- Autodesk Inventor® Series 10
- Autodesk® Land Development Desktop 2006
- Autodesk Map® 3D 2006
- Autodesk® Raster Design
- Autodesk® Revit® 8
- Autodesk® Survey

How it Works

When a user selects a subscription menu item in the product Help menu, the product sends basic information including the product name, release version and serial number through a secure connection to Autodesk subscription servers to determine subscription status. If that product is covered on an active subscription contract the customer is given the opportunity to create a Subscription Center profile and directly access e-Learning and Web Support. If the product is not covered on an active subscription contract the customer is directed to general subscription program information.

Service Access Levels

Service Access Levels allow Contract Managers to manage their users access to Autodesk web support, e-Learning and downloads. Access to services can be assigned by contract and by user. Users are notified when their access levels have been changed.

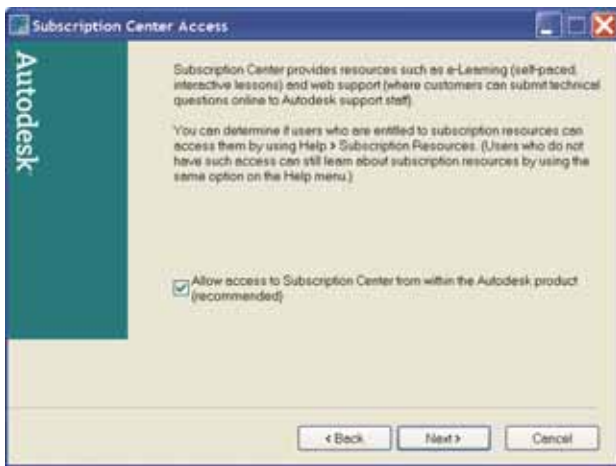

Account Creation Control

Manage User Account Creation located in the Administration section of the Subscription Center is where Contract Managers and Software Coordinators can choose one of two options to manage user access. They can either let users create their own account or elect to specifically invite users to access Subscription Center via email.

Menu Item Visibility

For Administrators that work within secure settings and do not want their users to have access to external environments, the Network Setup Wizard found during installation offers the ability to add or remove subscription help menu items. For stand-alone products, the CAD Manager Control Utility is used to change this setting.

e-Learning Catalog

The e-Learning catalog provides subscription customers access to self-paced, interactive lessons for select Autodesk products.

Create Support Request

The Create Support Request link provides subscription customers direct, one-to-one communication with Autodesk support technicians for fast, complete product support.

View Support Requests

The View Support Requests link allows subscription customers to track and manage submitted support requests and any responses.

Edit Subscription Center Profile

The Edit Subscription Center Profile link allows customers to update and edit their user name, email address, and personal account preferences.
